

## Black Nitride Compensating Muzzle Brake -

Machined above and beyond our competitors' tolerances and quality, the F-1 Firearms Black Nitride Compensating Muzzle Brake was specifically designed to eliminate muzzle rise and severely reduce recoil. The F-1 CMB underwent months of research and development including full auto testing to ensure that the accuracy, quality, and durability of this brake were indeed the best of the best.

\* Available in angle and flat-faced configurations.

## Fluted 16" Medium Contour Match Barrel -

We machine our barrels out of 416SS- twice in-line heat treated material and finish using a state of the art barrel cell. Holding an internal straightness tolerance to 0.0001" coupled with air-gauging in the QA/QC process to 5 decimals ensures that our barrels will consistently outperform the shooter. Barrels available in multiple lengths/profiles in 5.56, .300AAC, and .308. To reduce weight while adding to the visual appeal we offer fluting in standard, brick, dimple and diamond patterns.

## C7K Contoured 14.75" Handguard -

Uniquely designed with a quick placement grip area for ease of repeatability and comfort. This handguard is lighter than most competitors while maintaining a large inside diameter (1.65" ID) allowing most major suppressors to fit within the ID of the rail. Machined out of 7075-T6 domestic Aluminum, and hand finished, this handguard offers Key-Mod attachment points without a bulky quad rail feel which gives our customers the ability to customize as needed.

## BDR-15 3G Receiver Set -

This receiver set is a modern take on the MIL-SPEC M16 of yester-year. This set was meticulously engineered to be as lightweight as possible, while remaining rigid and cosmetically pleasing. All areas not inherent to functionality have been stripped away, leaving a beautiful base for any build. Each set is hand finished and matched in-house, for the utmost in operational and cosmetic perfection that our customers have come to expect from F-1 Firearms. BDR-15-3G sets accept all MIL-SPEC patterned parts as well as Magpul mags.

## Durabolt 5.56 Bolt Carrier Group -

The DuraBolt direct impingement, full auto rated M16/M4 bolt carrier group, for use in AR15 platforms, is compatible with MIL-SPEC receivers and associated components. The pictured DuraBolt Black DLC is enhanced with a Chemical Vapor Disposition (CVD) coating, which gives it an extremely durable and corrosion resistant black mirror finish. This coating also offers unmatched lubricity with a 0.01 coefficient of friction, the best in the industry.

## Industry First Ingenuity -

Through extremely rigorous internal and external testing by some of the best in the industry, our Skeletonized 3G sets have continuously outperformed all expectations. Our rigid base product coupled with the meticulously placed venting has not only proven to be a viable alternative to standard AR models, but has broken through the turmoil, doubt, and questioning of professionals, operators, and civilians alike. From industry leaders such as Ballistic Magazine, to Demolition Ranch, to our own and others destructive testing, it has continued to surprise and impress even the most skeptical of traditionalists.

## Attention to Detail -

Each F-1 Firearms component is made with the highest quality material available on some of the newest, most precise machines in the industry. Each and every part is hand finished to perfection with QA/QC along each step in the process to ensure the very best product to our consumers. We pay strict attention to detail so you don't have to.

## Pick the Right Metal for the Job -

We use the highest of quality metals on our products. From 9310 steel on bolt carriers, carpenter 158 on the bolt, 17-4 for our firing pins, 416 twice in-line heat treated barrel round stock for drilling, reaming and rifling, all the way to the 7075-T6 that we meticulously machine into skeletonized receiver sets and light weight durable handguards. Why would we invest all of our money in new machines, hand finishing, assembling, and QA/QC if we didn't start with the best input Aluminums and Steels to initiate the process. F-1 Firearms doesn't cut corners; We raise the bar.

## Charging Handle -

The F-1 Firearms charging handle is standard and comes to you with oversized, fully ambidextrous control latches that not only compliment the high end look and feel of the rifle, but also ensure the best operation available.
